SOFTWARE WEB DEVELOPMENT

INTERNSHIP OVERVIEW

Precision Planting, a leading provider of precision agriculture technology, is seeking interns to help develop our growing suite of on-equipment control, cloud, and mobile products. At Precision Planting, we focus on helping farmers across the world be more efficient - growing yields, reducing inputs, and saving time. Interns at Precision Planting play an active role in product development and help solve real-world problems. You will spend time authoring code to build out new product capability and have the opportunity to see your work used by customers.

Responsibilities:

- Developing new features and capabilities for our software & electronics product suite
- Climbing on agricultural equipment to validate and experience our products first-hand
- Solving complex technical problems

Required Skills/Experience:

- Currently enrolled as a sophomore or higher in a BS or MS Computer Science program or equivalent
- a GPA of at least 3.0/4.0
- Software development experience in NodeJS/Typescript
- Experience with full-stack web development
- Excellent time management, organizational, and problem solving skills
- Willingness to work outside and in the office
- Personal Transportation
- Willingness to relocate to the Peoria, IL area if necessary

Desired Skills/Experience:

- Experience working with cloud-native applications
- Experience with React or a similar front-end framework
- Experience with Infrastructure as Code
